

CORPORATE CAPABILITY PROFILE

Shri Chandra Global Exim & Infra Private Limited

INFRASTRUCTURE & CIVIL PROJECTS

Infrastructure · Civil Construction · Industrial Projects · Project Execution

An infrastructure and project execution company backed by the established Shri Chandra Group.

SCGEIPL / 2026

About Shri Chandra Group

An established business ecosystem supporting diversified industrial and infrastructure opportunities.

The Shri Chandra Group brings together experience and relationships across maritime, EXIM, logistics, energy and technical service environments. This broader ecosystem provides the context in which SCGEIPL is developing its infrastructure and civil projects vertical.

SCGEIPL should be understood as the infrastructure-focused company and execution platform of the wider Group. The Group's sector connectivity is distinct from SCGEIPL's own project credentials.

SECTOR CONNECTIVITY

Shipping & Maritime	**Customs & EXIM**	**Logistics & Freight Handling**
Energy & Power	**Seismic & Geophysical Services**	**Shore Base & Industrial Services**

MARITIME

Shipping, port and marine-facing relationships

EXIM

Customs, import-export and trade connectivity

INDUSTRIAL

Energy, shore base and technical services

INFRA

SCGEIPL's focused civil and project execution vertical

A diversified platform for industrial opportunity.

About the Company

A focused infrastructure platform within the Shri Chandra Group.

Shri Chandra Global Exim & Infra Private Limited (SCGEIPL) is focused on developing and executing opportunities across civil construction, industrial infrastructure, data centre infrastructure, port infrastructure, logistics facilities and project execution.

The company combines the established business ecosystem of Shri Chandra Group with a dedicated focus on infrastructure development and project execution, built on disciplined planning, site coordination, quality control, safety management and schedule adherence.

THE STRATEGIC DISTINCTION

Established Group ecosystem; emerging infrastructure and civil execution vertical.

EXECUTION LOGIC

01	02	03	04	05	06
IDENTIFY	PLAN	MOBILISE	EXECUTE	MONITOR	COMPLETE

FOCUS

Infrastructure and civil projects with defined scope and deliverables.

DISCIPLINE

A structured approach to resources, quality, safety and documentation.

PARTNERSHIP

Flexible engagement with main contractors, EPCs and developers.

Infrastructure & Civil Projects

A defined capability platform for industrial, digital, maritime and logistics environments.

CIVIL CONSTRUCTION

Earthworks, concrete, structural and building works for identified packages.

INDUSTRIAL INFRASTRUCTURE

Buildings, warehouses, utilities, yards and equipment foundations.

DATA CENTRE INFRASTRUCTURE

Civil foundations, RCC structures, utilities, roads, drainage and external development.

PORT & MARITIME

Port civil works, storage, yards, shore-base and industrial support facilities.

ROADS & EXTERNAL DEVELOPMENT

Internal roads, pavements, site development and drainage systems.

RETROFITTING & REHABILITATION

Defined strengthening, rehabilitation and upgrade packages.

POSITIONING

A serious execution partner for defined work packages.

Developed with a clear emphasis on execution readiness, partner alignment and credible project delivery — not unsupported breadth of claims.

Adani – Google Data Centre

Civil Works | Our entry into large-scale infrastructure execution.

SCGEIPL's infrastructure journey is marked by its involvement in civil works associated with the Adani–Google Data Centre project.

The project represents the company's entry into the demanding digital infrastructure and data centre construction sector, where disciplined planning, coordination, quality control, safety management and schedule adherence are critical.

PROJECT **Adani – Google Data Centre – Project Crossbow**	SECTOR **Data Centre / Digital Infrastructure**
NATURE **Civil Works**	LOCATION **Tarluvada**
SCOPE **Execution of Civil Works**	STATUS **In Progress**

Civil & Structural Capabilities

Defined work packages across the construction cycle.

EARTHWORKS

Site clearance · Excavation · Filling & backfilling · Ground preparation

CONCRETE WORKS

PCC · RCC · Foundations · Footings · Columns · Beams · Slabs · Equipment foundations

BUILDING WORKS

Industrial buildings · Administrative buildings · Utility buildings · Warehouses · Service structures

EXTERNAL & SPECIALISED WORKS

Internal roads · Pavements · Drainage · Site development · Retrofitting · Rehabilitation

Scope clarity before resource mobilisation.

Each assignment is defined by drawings, quantities, interfaces, programme, quality requirements and safety expectations before mobilisation.

Industrial & Digital Infrastructure

Civil execution for facilities where reliability, interfaces and programme control matter.

DATA CENTRE INFRASTRUCTURE

Civil packages supporting digital infrastructure and critical utility environments.

Site development · Civil foundations · RCC structures · Equipment foundations · Utility buildings · Roads & yards · Drainage · External development

INDUSTRIAL INFRASTRUCTURE

Built environment packages for industrial production, storage and support operations.

Industrial buildings · Warehouses · Bulk sheds · Storage facilities · Utility structures · Equipment foundations · Administrative buildings

INTERFACES

Coordinate civil works with MEP, equipment, utilities and other package interfaces.

CONTROL

Maintain focus on sequence, quality, HSE and documentation.

READINESS

Mobilise resources against an agreed scope and execution plan.

Port & Maritime Infrastructure

Shri Chandra Group's own assets at the port, extended into defined civil, storage and shore-base packages.

GROUP ASSETS AT THE PORT

Our own assets, on the ground.

Shri Chandra Group has its own assets at the port, supported by its association with shipping, maritime services, logistics and EXIM operations.

- **Group-owned assets on site at the port**
- **Direct familiarity with port operations**
- **SCGEIPL as the civil and infrastructure execution arm**

CAPABILITY AREAS

- **Port civil works**
- **Storage facilities**
- **Bulk cargo infrastructure**
- **Container / yard infrastructure**
- **Shore-base facilities**
- **Internal roads & pavements**
- **Utility infrastructure**
- **Administrative & service buildings**
- **Industrial support facilities**

Scope and credentials are confirmed project by project.

Project Execution Capability

A practical workflow for controlled mobilisation, delivery and handover.

01
PLANNING
Scope, drawings, quantities, interfaces and programme.

02
MOBILISATION
Manpower, equipment, site systems and logistics.

03
PROCUREMENT
Materials, vendors, approvals and delivery tracking.

04
EXECUTION
Supervision, sequence, productivity and coordination.

05
QA/QC
Inspection, testing, records and corrective actions.

06
HSE
Safe systems of work, compliance and site awareness.

07
MONITORING
Progress, measurement, reporting and interface control.

08
HANDOVER
Completion records, punch points and close-out.

SUPPORTING CAPABILITIES

- Project management
- Site engineering
- Supervisory manpower
- Skilled and semi-skilled workforce
- Construction equipment
- Material procurement
- Subcontractor coordination
- QA/QC and HSE
- Project documentation
- Measurement and billing

Partnering

Flexible engagement models aligned to the delivery needs of the main contractor.

CIVIL SUBCONTRACTOR

Defined civil work packages delivered against agreed scope, programme and quality requirements.

PACKAGE CONTRACTOR

End-to-end execution of identified packages with responsibility for coordination and close-out.

EXECUTION PARTNER

Resource and site execution support aligned to the main contractor's delivery model.

JV / CONSORTIUM PARTNER

Collaboration for larger, specialised or multi-disciplinary projects.

PROJECT DEVELOPMENT PARTNER

Support from project identification through partner alignment and execution planning.

LONG-TERM PLATFORM

A basis for building repeatable relationships as project credentials develop.

TARGET PARTNERS

- EPC contractors
- Construction companies
- Infrastructure developers
- Industrial developers
- Data centre developers
- Port developers and operators
- Energy companies
- Government and PSU contractors

SCGEIPL seeks opportunities where its infrastructure focus, Group ecosystem and execution orientation complement an established delivery platform.

Why Partner with SCGEIPL

A credible, flexible and growing infrastructure platform.

01 ESTABLISHED GROUP BACKING

Supported by the wider Shri Chandra Group ecosystem.

02 MULTI-SECTOR CONNECTIVITY

Exposure to maritime, logistics, EXIM, energy and technical sectors.

03 INFRASTRUCTURE FOCUS

Dedicated strategic focus on civil and infrastructure execution.

04 INDUSTRY UNDERSTANDING

Strong connection with industrial, port and logistics environments.

05 FLEXIBLE ENGAGEMENT

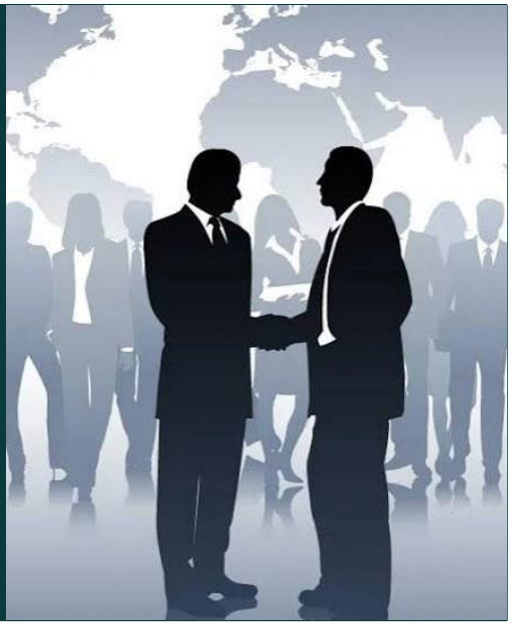
Subcontracting, package execution, JV and consortium models.

06 GROWING PROJECT CREDENTIALS

Building credentials through assignments including the Adani–Google Data Centre project.

Confident in ambition. Precise in claims.

SCGEIPL's proposition is grounded in what is established, what is developing and what is being built through current assignments.



Building the Next Generation of Infrastructure

A staged pathway from civil execution to integrated project development.

1 **TODAY**
Civil & Infrastructure Execution

2 **NEXT**
Industrial & Data Centre Projects

3 **EXPANSION**
Port & Maritime Infrastructure

4 **GROWTH**
Energy & Logistics Infrastructure

5 **VISION**
Integrated Infrastructure & Project Development

"Our vision is to develop SCGEIPL into a trusted infrastructure and project execution partner serving India's growing industrial, digital, maritime, logistics and energy infrastructure sectors."

Let’s Build Together

SCGEIPL welcomes opportunities to collaborate with established construction companies, EPC contractors, developers and infrastructure organisations.

CURRENT OPPORTUNITY AREAS

- Civil Work Packages
- Subcontracting
- EPC Partnerships
- Package Execution
- JV / Consortium Opportunities
- Infrastructure Development

A strong relationship starts with an agreed scope, a clear interface and a shared commitment to delivery.

LET’S DISCUSS

Share your project scope, location, programme, package requirements and partnership model. SCGEIPL can then evaluate alignment and next steps.
